INTRODUCTION

To ignite this revolution, we're launching \$PLAYR with an exclusive airdrop, giving early adopters a head start. This airdrop will encompass 0.5% of the total supply, amounting to 250 million tokens. Simply register your interest at oneplayr.com/airdrop with your email and wallet address, and you'll secure the right to receive these \$PLAYR tokens. This distribution will coincide with the ICO, planned for Q1 2025.

Additionally, another 0.5% (250 million tokens) will be distributed during the pre-sale through special promotions and giveaways. The more engaged you are, the more tokens you can earn — follow us on social media or invite friends to increase your share in the airdrop. We want to grow together and allow our early adopters to truly participate in the future of football fandom.

TOKENOMICS

\$PLAYR TOKENOMICS

POWERING THE FUTURE OF SPORTS ENGAGEMENT

The \$PLAYR token is the heart of the OnePlayr.com ecosystem, facilitating seamless interaction and unlocking a world of possibilities. Early supporters can acquire \$PLAYR tokens through an exclusive airdrop. Simply register your email and wallet address on the OnePlayr.com landing page to receive 100 \$PLAYR tokens (valued at €5). These tokens will be distributed to registered wallets one day before the pre-sale launch.

PRE-SALE PHASE

The \$PLAYR token pre-sale will be hosted on the OnePlayr.com website, featuring a tiered pricing structure across four distinct phases. A total of 5 billion tokens will be available for purchase using

WETH (Wrapped Ether), Polygon, or USDT. Each phase offers an attractive entry point, with the price per token increasing incrementally as each phase successfully concludes.

PHASE	PRICE PER TOKEN (IN €)	TOKENS ALLOCATED (BILLION)	POTENTIAL REVENUE (IN € MIO)	EXPECTED ICO SELLING PRICE PER TOKEN (IN €)	EXPECTED INCREASE TO ICO (IN %)
1	0,003	2,0	6,0	0,5	1566,66
2	0,005	1,5	7,5	0,5	900
3	0,008	1,0	8,0	0,5	525
4	0,010	0,5	5,0	0,5	400
TOTAL		5,0	26,5	0,5	

ICO PHASE

Following the conclusion of the pre-sale, the \$PLAYR ICO will commence:

- # All unsold pre-sale tokens will be burned.
- # The ICO will be conducted on both centralized exchanges (CEXs) and decentralized exchanges (DEXs), including Bison, Kraken, Binance, Coinbase, Kucoin, and Bitpanda.
- # All tokens raised during the ICO, along with funds from the liquidity pool, will be used to establish robust liquidity on exchanges.
- # A vesting schedule will be implemented for the remaining tokens, utilizing a cliff and graded vesting model, with distributions to project contributors occurring after a predetermined period.

NOTE: IF THE PRE-SALE DOES NOT REACH COMPLETION BY JANUARY 31ST, 2025, THE ICO WILL COMMENCE ON FEBRUARY 1ST, 2025.

UTILITY FEATURES

TO ENHANCE THE APPEAL OF THE \$PLAYR TOKEN AND ENCOURAGE LONG-TERM HOLDING, SEVERAL UTILITY FEATURES WILL BE IMPLEMENTED:

1. STAKING

- # Users can stake their \$PLAYR tokens directly through the OnePlayr.com dashboard.
- # Staked tokens are locked within a secure smart contract.
- # The smart contract distributes \$FAN token staking rewards every X blocks/X days.
- # Staking rewards are calculated as follows:
 $\text{Reward} = \text{Staked Amount} \times \text{Reward Rate} \times \text{Number of Days}$.
- # Additional rewards are provided through a 1% share of all transaction fees generated within the OnePlayr.com network.

2. \$FAN TOKEN:

- # \$FAN tokens are generated based on the limited supply of \$PLAYR tokens.
- # While \$FAN tokens cannot be sold, they unlock a range of benefits within the ecosystem:
 - # Unlocking exclusive app features
 - # Discounts on NFT and merchandise purchases
 - # Participation in exclusive giveaways and raffles

3. \$FAN DAO:

- # Planned for future development, the \$FAN DAO will empower users to leverage their \$FAN tokens for voting on governance proposals, shaping the future of the app and influencing key decisions.

4. NFTS:

- # Users can purchase NFTs of individual athletes within the app, showcasing their support and unlocking unique experiences.

POST SALE PHASE

The OnePlayr ecosystem offers a modern approach to gamification. The core functionalities of the app will be accessible without requiring a wallet, tokens, or NFTs. However, tokens and NFTs unlock additional features,

income-generating opportunities, and exclusive rewards for dedicated community members. Further software integrations within the OnePlayr ecosystem, such as talent scouting platforms, are planned for future development.

TOKEN DISTRIBUTION

- # Total Token Supply: 50 billion
- # Allocation:
 - # Pre-Sale: 5 billion (10%)
 - # ICO & Liquidity Providers: 18 billion (36%)
 - # Team and Advisors: 5 billion (10%)
 - # Reserve: 6.5 billion (13%)
 - # Ecosystem and Partnerships: 10 billion (20%)
 - # Community and Marketing: 5 billion (10%)
 - # Airdrop: 0.5 billion (1%)

VESTING SCHEDULE

To ensure the long-term commitment of the team and incentivize sustainable growth, a vesting schedule will be implemented:

- # **Cliff Period:** 6 months
- # **Graded Vesting:** 25% released after the cliff period, followed by 25% annually

EXCHANGE LISTINGS

\$PLAYR will be listed on both centralized exchanges (CEXs) and decentralized exchanges (DEXs) to provide maximum accessibility and liquidity for token holders. Tokens allocated for the ICO and liquidity provision will be distributed across various DEXs and selected CEXs.

TRANSACTION FEES

A nominal 2% fee will be applied to all \$PLAYR token transactions. This fee structure supports the on-going development and sustainability of the OnePlayr ecosystem:

- # **Community Fund (1%):**
1% of each transaction fee will be allocated to a dedicated wallet designated for charitable causes. The OnePlayr community will have the power to vote on the allocation and distribution of these funds.
- # **Staking Rewards (1%):**
The remaining 1% of each transaction fee will be distributed proportionally to all \$PLAYR stakers, rewarding their commitment and contribution to the network's security.

SECURITY MEASURES

COMPREHENSIVE SECURITY AND TRUST MEASURES

Ensuring the security of our ERC721 smart contract and the broader ecosystem is paramount to maintaining trust and reliability for our users. To achieve this, we employ a multi-layered security approach that encompasses both external and internal measures.

EXTERNAL SMART CONTRACT AUDITS

We engage external smart contract audits from known and trusted providers. These independent audits scrutinize our contract code for vulnerabilities and potential exploits, providing a crucial third-party validation of our security measures.

COMPANY KYC

Our organization undergoes comprehensive Company-KYC procedures. These processes help establish the legitimacy and integrity of our operations, ensuring that all stakeholders are verified and that the platform operates within legal and regulatory frameworks. This adds an additional layer of trust for our users and partners.

MILITARY-GRADE SECURITY AUDITS

Beyond standard audits, we subject our system to rigorous external military-grade security audits. These audits employ advanced techniques and methodologies typically reserved for high-security applications.

INTERNAL QUALITY ASSURANCE (QA)

Internally, our Quality Assurance (QA) team performs meticulous reviews and testing of all code. This includes continuous integration and deployment processes that help identify and resolve issues swiftly.

UNIT-TESTED CODE BASE

Our commitment to security extends to our development practices with a 100% unit-tested code base. Every component of our smart contract is individually tested to verify that it performs as expected under various conditions. By integrating unit tests into our development cycle, we ensure that any changes to the code do not introduce new vulnerabilities or bugs.

VERSIONING

REASONS BEHIND VERSIONING

SEAMLESS UPGRADES

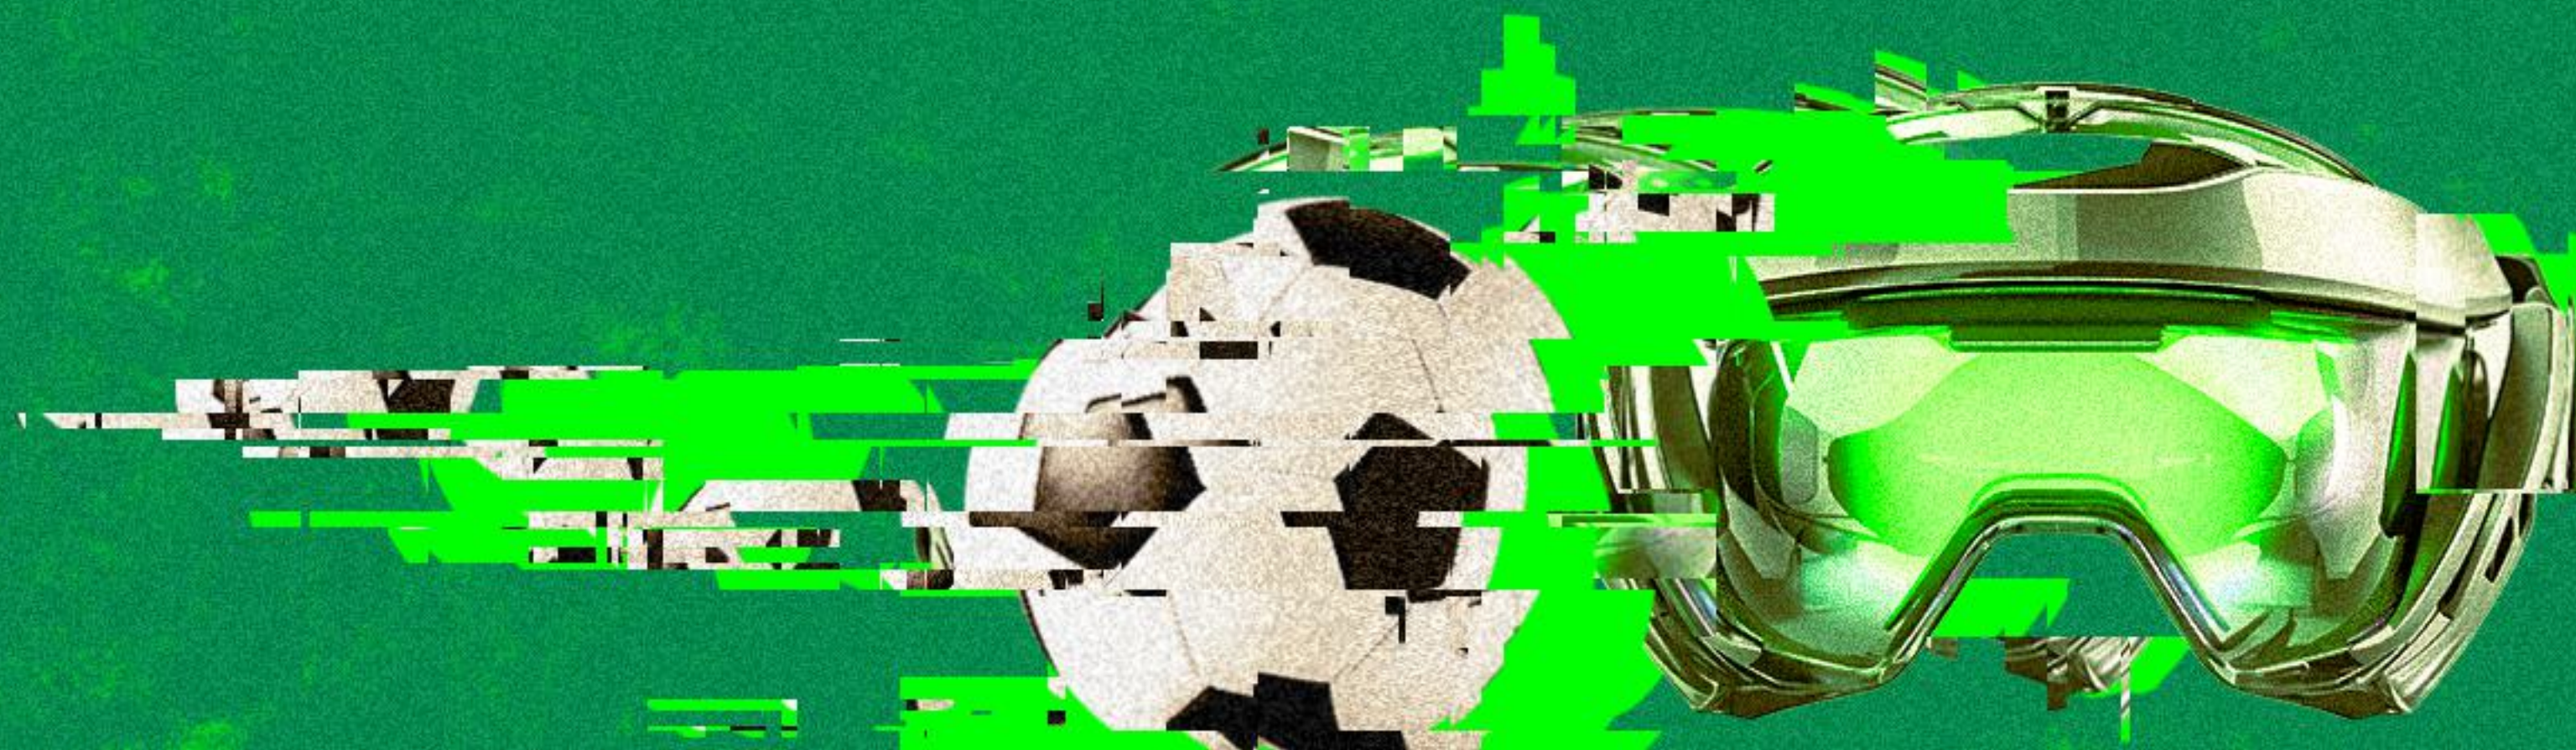

By using proxy contracts, we can deploy new versions of our smart contract logic without requiring users to interact with a different address. The proxy contract remains the constant point of interaction, forwarding calls to the latest implementation. This seamless upgrade capability ensures that users always interact with the most secure and feature-rich version of the contract, benefiting from improvements and fixes immediately after deployment.

DATA CONSISTENCY

One of the significant challenges in upgrading smart contracts is maintaining data consistency. With proxy contracts, the storage layout is kept intact, as the state variables reside in the proxy itself rather than the logic contracts. This means that even when the logic is upgraded, the data remains consistent and preserved. Users can rest assured that their NFTs and associated metadata are stable and secure across contract versions.

REDUCED DOWNTIME AND COSTS

Implementing proxy contracts reduces the downtime typically associated with deploying new contract versions. Since the proxy contract address does not change, there is no need for users to update their records or for the project to migrate data manually. This approach also minimizes the gas costs involved in redeploying and initializing new contracts, making the process more efficient and cost-effective.
